Presentation of new Benchmark Data by Polly

- Fall intervention served 84 students
- Fall data showed 80% of students were below benchmark and 20% well below benchmark
- After winter testing interventions students showed 26% on grade level, 56% below benchmark, and 18% well below benchmark
- Some students that tested on grade level were sometimes moved out, but some stayed in to make sure they don't slide back in.
- Groups are topped out at 6 students.
- Students are identified by grade level – each grade gets 18 students in intervention – not necessarily 6 per teacher
- Three students either did not move or scored lower than in fall.
- 81 of the 84 met or exceeded the National Rate of Increase in reading growth
- Looked at grade level tier transition reports.
- Noticed that some grades have more students in below benchmark area than in fall. Discussed the fact that the growth goals are not evenly divided within the year.
- Kindergarten data will be looked at during our next meeting as it was recently conducted.

Next meeting Thursday, March 26 6:00 – 7:00

- **Discuss CSIP**

Meeting on Thursday, April 23 6:00 – 7:00
